## DETAILED ACTION

1. The preliminary amendment filed on 18 January 2002 has been entered.

### *Oath/Declaration*

2. The oath/declaration filed on 20 May 2002 is acceptable.

### *Drawings*

3. Figure 3 is objected to under 37 CFR 1.83(a). The abscissa and mantissa of the graph depicted in figure 3 are labeled "x" and "y" with no indication of what scale measurements are depicted. Therefore, the abscissa and mantissa must be shown or the figure canceled. No new matter should be entered. The examiner has looked, without success, to the written specification for an explanation of what scale measurements are depicted in this figure.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Priority*

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Art Unit: 2826

***Information Disclosure Statement***

5. The Information Disclosure Statement filed on 20 May 2002 has been considered.

***Specification***

6. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

***Claim Objections***

7. Claim 3 is objected to because of the following informalities: The parenthetical expression  $0 < X < 0.4$  should be amended to read  $0 < X < 0.4$ , for proper sense. Appropriate correction is required. Further, on page 5 of the application, in paragraph 26 applicant states that when X is less than .1, a  $Zn_{1-x}Cd_xSe_{1-y}Te_y$  crystal emits blue light, not yellow light as is required of the light emitting layer of the first epitaxial layer group. This statement is supported by applicant's figure 4. It is suggested that applicant change the range  $0 < X < 0.4$  to the range  $0.1 < X < 0.4$ , to avoid claiming a range that produces a device that, according to applicant's own disclosure, cannot meet the yellow light limitation of base claim 1.

***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2826

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by

MATSUBARA et al. (EP 977278 A2).

Matsubara et al. discloses a semiconductor light-emitting element with a substrate 16, a first epitaxial layer group 20 to emit a yellow color light which is provided on the substrate 16 and made of II-VI semiconductor compounds, and a second epitaxial layer group 22-23-24-25 to emit a blue color light which is provided on the substrate 16 and made of II-VI semiconductor compounds, wherein the second epitaxial layer group 22-23-24-25 includes a light-emitting active layer 23-24-25 made of a II-VI semiconductor compound containing Zn, Se, Te and Cd. Note figures 3-5 and column 16 lines 15-35 of Matsubara et al.

#### ***Allowable Subject Matter***

9. Claims 2-5 and 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***
